- 10. Your Admin Credentials

SECTION 1

Logging Into the Admin Panel

- 1. Open the website and scroll to the bottom of any page. In the footer, click **Admin** — or go directly to `/admin/login` on your site's address (e.g. `https://yourdomain.com/admin/login`).
- 2. Enter your **email address** and **password** exactly as issued to you (see Section 10 for your credentials).
- 3. Click **Sign In**.

If your details are correct, you'll land on the **Dashboard** — a dark screen with your name, a role badge, and a menu down the left-hand side.

IF LOGIN FAILS

Double-check for extra spaces when copying your password, and confirm Caps Lock is off. If it still fails, your account may have been deactivated by a Super Admin — contact them to reactivate it.

SECTION 2

Understanding the Dashboard

The left-hand sidebar is your control center. What you see there depends on your assigned role — not everyone sees every menu item.

MENU ITEM	WHAT IT'S FOR
Dashboard	An overview: total books, orders, customers, and revenue, plus a 30-day sales chart.

Books	Manage the book catalog — titles, prices, covers, purchase links.
Orders	See every purchase made through the site, and issue refunds.
Customers	Everyone who has ever bought a book, and what they bought.
Blog	Where you write and manage blog posts — this is what this guide focuses on.
Social Links	The Instagram/YouTube/etc. icons shown in the site's navigation bar.
Team	Create and manage other admin accounts (Super Admins only).

At the top of the sidebar you'll see your email and a colored badge showing your role (e.g. *Content Editor* or *Super Admin*). Only **Super Admin** and **Content Editor** roles can create and publish blog posts.

SECTION 3

Creating a New Blog Post — Step by Step

1. In the sidebar, click **Blog**.
2. Click the + **New Post** button in the top-right corner.
3. Fill in the fields on the form that appears:
 - **Title** — the headline of your post. A web-friendly URL slug is generated from this automatically.
 - **Excerpt** — a one-to-two sentence summary. This appears in post previews and search results, so make it count.
 - **Cover Image** — click to upload a photo that represents the post. This is the image readers see first.
 - **Category** — choose an existing category from the dropdown (see Section 6 to add new ones).
 - **Tags** — type a word and press comma/enter to add a tag (e.g. `faith`, `writing life`, `Igbo culture`). Tags help readers browse related posts.
4. Write your post in the large content box below the fields — see Section 4 for how to format it.
5. Scroll down to the **SEO** section (optional but recommended) and fill in a meta title/description if you want more control over how the post appears when shared or searched for.
6. Choose a **Status** — Draft, Scheduled, or Published (see Section 5).
7. Click **Save**.

TIP

You can click Save at any point, even with an unfinished post — it will simply save as a Draft until you're ready to publish. Nothing goes live until you explicitly set the status to Published.

SECTION 4

Using the Editor Toolbar

The content box has a formatting toolbar along the top, similar to Microsoft Word or Google Docs:

BUTTON	EFFECT
Headings (H1–H3)	Break your post into sections with clear headings.
Bold / Italic / Underline / Strike	Standard text emphasis.
Bullet / Numbered / Task List	Organize points into lists or checklists.
Blockquote	Set apart a quotation or scripture verse.
Code Block	Display text in a fixed-width, code-style box.
Link	Select text, then click this to turn it into a clickable link.
Image	Insert a photo directly inside the body of the post (in addition to the cover image).
Table	Insert a simple table.
Text Align	Left, center, or right-align a paragraph.
Undo / Redo	Step backward or forward through recent edits.

A live word count and estimated reading time is shown at the bottom of the editor as you type.

SECTION 5

Publishing, Scheduling & Drafts

The **Status** dropdown controls whether — and when — a post becomes visible to the public:

STATUS	WHAT HAPPENS
Draft	Only visible to admins. Safe to leave unfinished for as long as you like.
Scheduled	Choose a future date and time. The post stays hidden until that moment, then goes live automatically — no need to log back in.
Published	Goes live on the site immediately upon saving.

FOR A WEEKLY ROUTINE

Scheduling is ideal for a weekly rhythm: write several posts in one sitting, set each to **Scheduled** a week apart, and they'll publish themselves on time — even if you're offline that day.

SECTION 6

Managing Categories

1. From the Blog page, click **Manage Categories** (top-right, next to + New Post).
2. To add one: type a **Name** (e.g. "Writing Life," "Faith & Grace," "Book News") and an optional description, then click **Add Category**.

- Existing categories are listed in a table below, with a **Delete** link for each. Deleting a category doesn't delete the posts in it — they simply keep the old category name as plain text.

SECTION 7

Editing or Deleting a Post

- Go to **Blog** in the sidebar — every post you've written is listed in a table, newest first.
- Click **Edit** next to any post to reopen it in the same form used to create it. Make your changes and click **Save**.
- Click **Delete** to permanently remove a post. You'll be asked to confirm — this cannot be undone.

You can use the filter dropdowns above the table to narrow the list down by **Status** or **Category** — handy once you have many posts.

SECTION 8

Where the Post Appears on the Site

- All published posts appear on the public **/blog** page, newest first.
- Each post gets its own page at **/blog/your-post-title**.
- Posts also appear on category pages (**/blog/category/...**) and tag pages (**/blog/tag/...**).
- Blog posts are readable by **any visitor** — readers do not need to sign up for the newsletter to read them.
- If you mark a post as **Featured**, it's highlighted above the regular list.

SECTION 9

Tips for a Weekly Blogging Routine

- Batch your writing.** Set aside one longer session to draft 2–4 posts, then schedule them a week apart rather than writing under pressure every week.
- Reuse your newsletter voice.** Since blog posts double as newsletter material, write once and it serves both channels.
- Always add a cover image and excerpt** — these are what make a post look inviting in the list view and when shared on social media.
- Keep categories few and consistent** (e.g. 4–6 total) so readers can browse by topic meaningfully.
- Preview before publishing** by saving as Draft first, checking the Edit view, then switching Status to Published or Scheduled when it's ready.

SECTION 10

Your Admin Credentials

A new **Super Admin** account has been created for you. Super Admins can do everything, including creating further admin accounts for other team members from the **Team** page.

LOGIN URL	/admin/login
EMAIL	administor@ihuomairoaganachi.com
PASSWORD	IaJezYeDtLcx\$atH

SECURITY NOTE

Store this password somewhere secure (a password manager, not a shared chat or plain text file). Anyone with these credentials has full administrative control of the site, including the ability to create other admin accounts.
